We Are a Laboratory Design Firm

OnePointe Solutions is a leading lab construction and design company, scientific furniture manufacturer, and lab builder. Our projects range from classrooms to Biosafety Level (BSL) -3 and BSL-3+ enhanced labs.

We can source anything you need for your project from the surface options, specific materials and provide custom quality designs that match your vision. Our 50,000 square foot facility is ideal for supplying architects, contractors, and scientists with fast and flexible design and custom manufacturing services.

With over a decade of experience as a manufacturer and access to a vast network of additional equipment providers, we are a one-stop-solution for partners seeking to expand their laboratory capabilities. We take pride in providing customers with high quality, custom manufacturer direct laboratory furniture.

By ordering from us, you will have access to our expert team of designers and project managers.

Lab Products

Core Products

- Casework
- Workbenches
- Carts
- Fume Hoods
- Chairs
- Countertops
- Table Tops

Countertops

- Epoxy Resin
- Phenolic Resin
- Stainless Steel
- ESD Laminate
- HDPE
- Maple Block
- Solid Surface

Instrumentation Carts

- Mass Spec
- Gas/Liquid Chromatography
- Pyrolysis
- Imaging
- BSL 2 and 3

Who We Work With

- Architects
- General Contractors
- Scientists
- Landlords

Areas of Expertise

- Generic Wet Chemistry
- Generic Biology & Life Science
- Generic Computational
- General Materials Science
- General & Specialized Nanotechnology
- General Analytical (GC, MS, etc.)
- Genetic Research
- Animal Research
- Hot Lab/Radiation
- Cleanrooms
- Cannabis Testing
- Dental/Medical
- Oil & Gas
- GeoChemistry & GeoMechanical
- Pyrolysis Laboratory
- Core Analysis Lab
- Molecular Spectroscopy
- Dedicated NMR
- Dedicated Process Chemistry
- Dedicated Organic Chemistry
- Catalyst Research and Production

Our Process

We Come to You

We travel nationwide free of charge. While onsite we provide expert advice and take field measurements.

We Draw It

After your onsite, we provide a 3D /ISO view, top down, and elevation drawings that address your pain points.

We Manufacture It

We build everything for your lab, to your exact specifications and to perfectly fit your space. Which means we control quality and can guarantee customer satisfaction.

We Install It

Our salaried install team delivers, unloads, and installs your laboratory per our drawings

Completion

We do not leave until 100% satisfaction. We provide superior customer service and support once the project is finished.

Installation Services

Installation Planning

When you order with our company, you are assigned a project manager to help with every detail of the install process, from manufacturing of casework and workbenches and cabinetry, to payment and fulfillment.

Site Logistics

Our team inspects your facility to determine the safest, most logical and least intrusive installation path into your facility.

Logistics

We ensure that all logistics are ready, we schedule delivery trucks and our personnel to offload and install at your facility.

Our Install Team

We do not hire out contractors to install our products. We have a factory trained installation team who exclusively installs our product.

Safety & Security

We adhere to any safety and security requirements that your company may have. We supply any necessary documentation to ensure our team is approved and prepared to enter your facility.

Site Clean Up

Throughout the installation process, all packaging material will be disposed up properly to leave your facility clean upon departure.

Post Installation Follow-up

After your installation is complete, we provide a follow up call or site visit to your facility to ensure that you are completely satisfied with your installation. If you have any issues after installation, we are here to help.
