

CALIBRATE COMMUNITY®

Workplace Solutions for Individuals and Teams

AIS

INSPIRATION STRIKES THE OPEN OFFICE

You can feel it from the moment you walk in. An upscale aesthetic. A custom sensibility. Even a sense of permanence. The inviting wood laminate and architectural design are so much more than you'd expect from an open office, and Calibrate Community® blends them easily to create inspired spaces for individuals, for teams, and for everyone.

**EFFICIENT DESIGN
MAKES MORE WITH LESS**

Calibrate Community is built around a laminate spine, an efficient central feature that gives every worker convenient access to power and data while effortlessly concealing the cords and cables behind an easily accessible flip-down door. Combine upper and lower storage elements along the spine from Community's simple kit of parts. Create personal workspaces with a residential feel using hutches of varying sizes, or divide and contain space with taller hutches that define departments and establish boundaries. It's your community. Create it.

VERSATILE SPACES EMPOWER EACH WORKER

Design beautiful and functional spaces with Community. With woodgrain finishes you'd expect to find in the executive suite and storage solutions often found in the open plan, Community allows you to create a wide range of work environments for the open plan, private offices, and shared spaces.

**AND HELP THEM
COME TOGETHER
AS A TEAM**

Community offices can transition into a collaborative space in mere seconds, bringing versatility to any space. With individual worktops that easily slide together and power always within reach along the spine, it's never been easier to collaborate on the fly. Designed to be both beautiful and efficient, Community sliding worktops help people make changes from moment to moment without the need for an outside conference room.

THE COMMUNITY WORKPLACE

Calibrate Community is part of the broader Calibrate Series – a family of private office casegoods, reception, storage and conferencing solutions. Community brings an architectural feel to the office, including workwalls to create boundaries or borders. Other AIS products, including Day-to-Day® Tables, PowerBeam, PowerBench, and a wide range of lounge seating, complement Community with shared dimensions and finishes for a uniform look throughout the workplace.

BUILD YOUR COMMUNITY

Smart design and intentional engineering make working with this simple kit of parts easy. Designers plan within Community, not around it.

Start With a Central Spine

Every Community begins with a single structure.

Four Spine Depths:

18, 24, 30 & 36"

Four Spine Mount Heights:

21, 29, 42 & 46"

Overall Height with

Stack-on Storage:

21 to 66"

Personal Space

Use the height and depth of the spine to create space between work stations. Add screens to create visual privacy between individuals and support focused work.

Natural Boundaries

The Community workwall divides space in a cost-effective way, replacing drywall or millwork while supporting additional workplace collaboration.

Sliding Worktops

Worksurfaces glide along the Community rail, giving users the power to convert individual spaces into team places and back again.

Multi-Tasking Hutches

Integrate monitors, tackboards or whiteboards to enable multiple activities within one Community space.

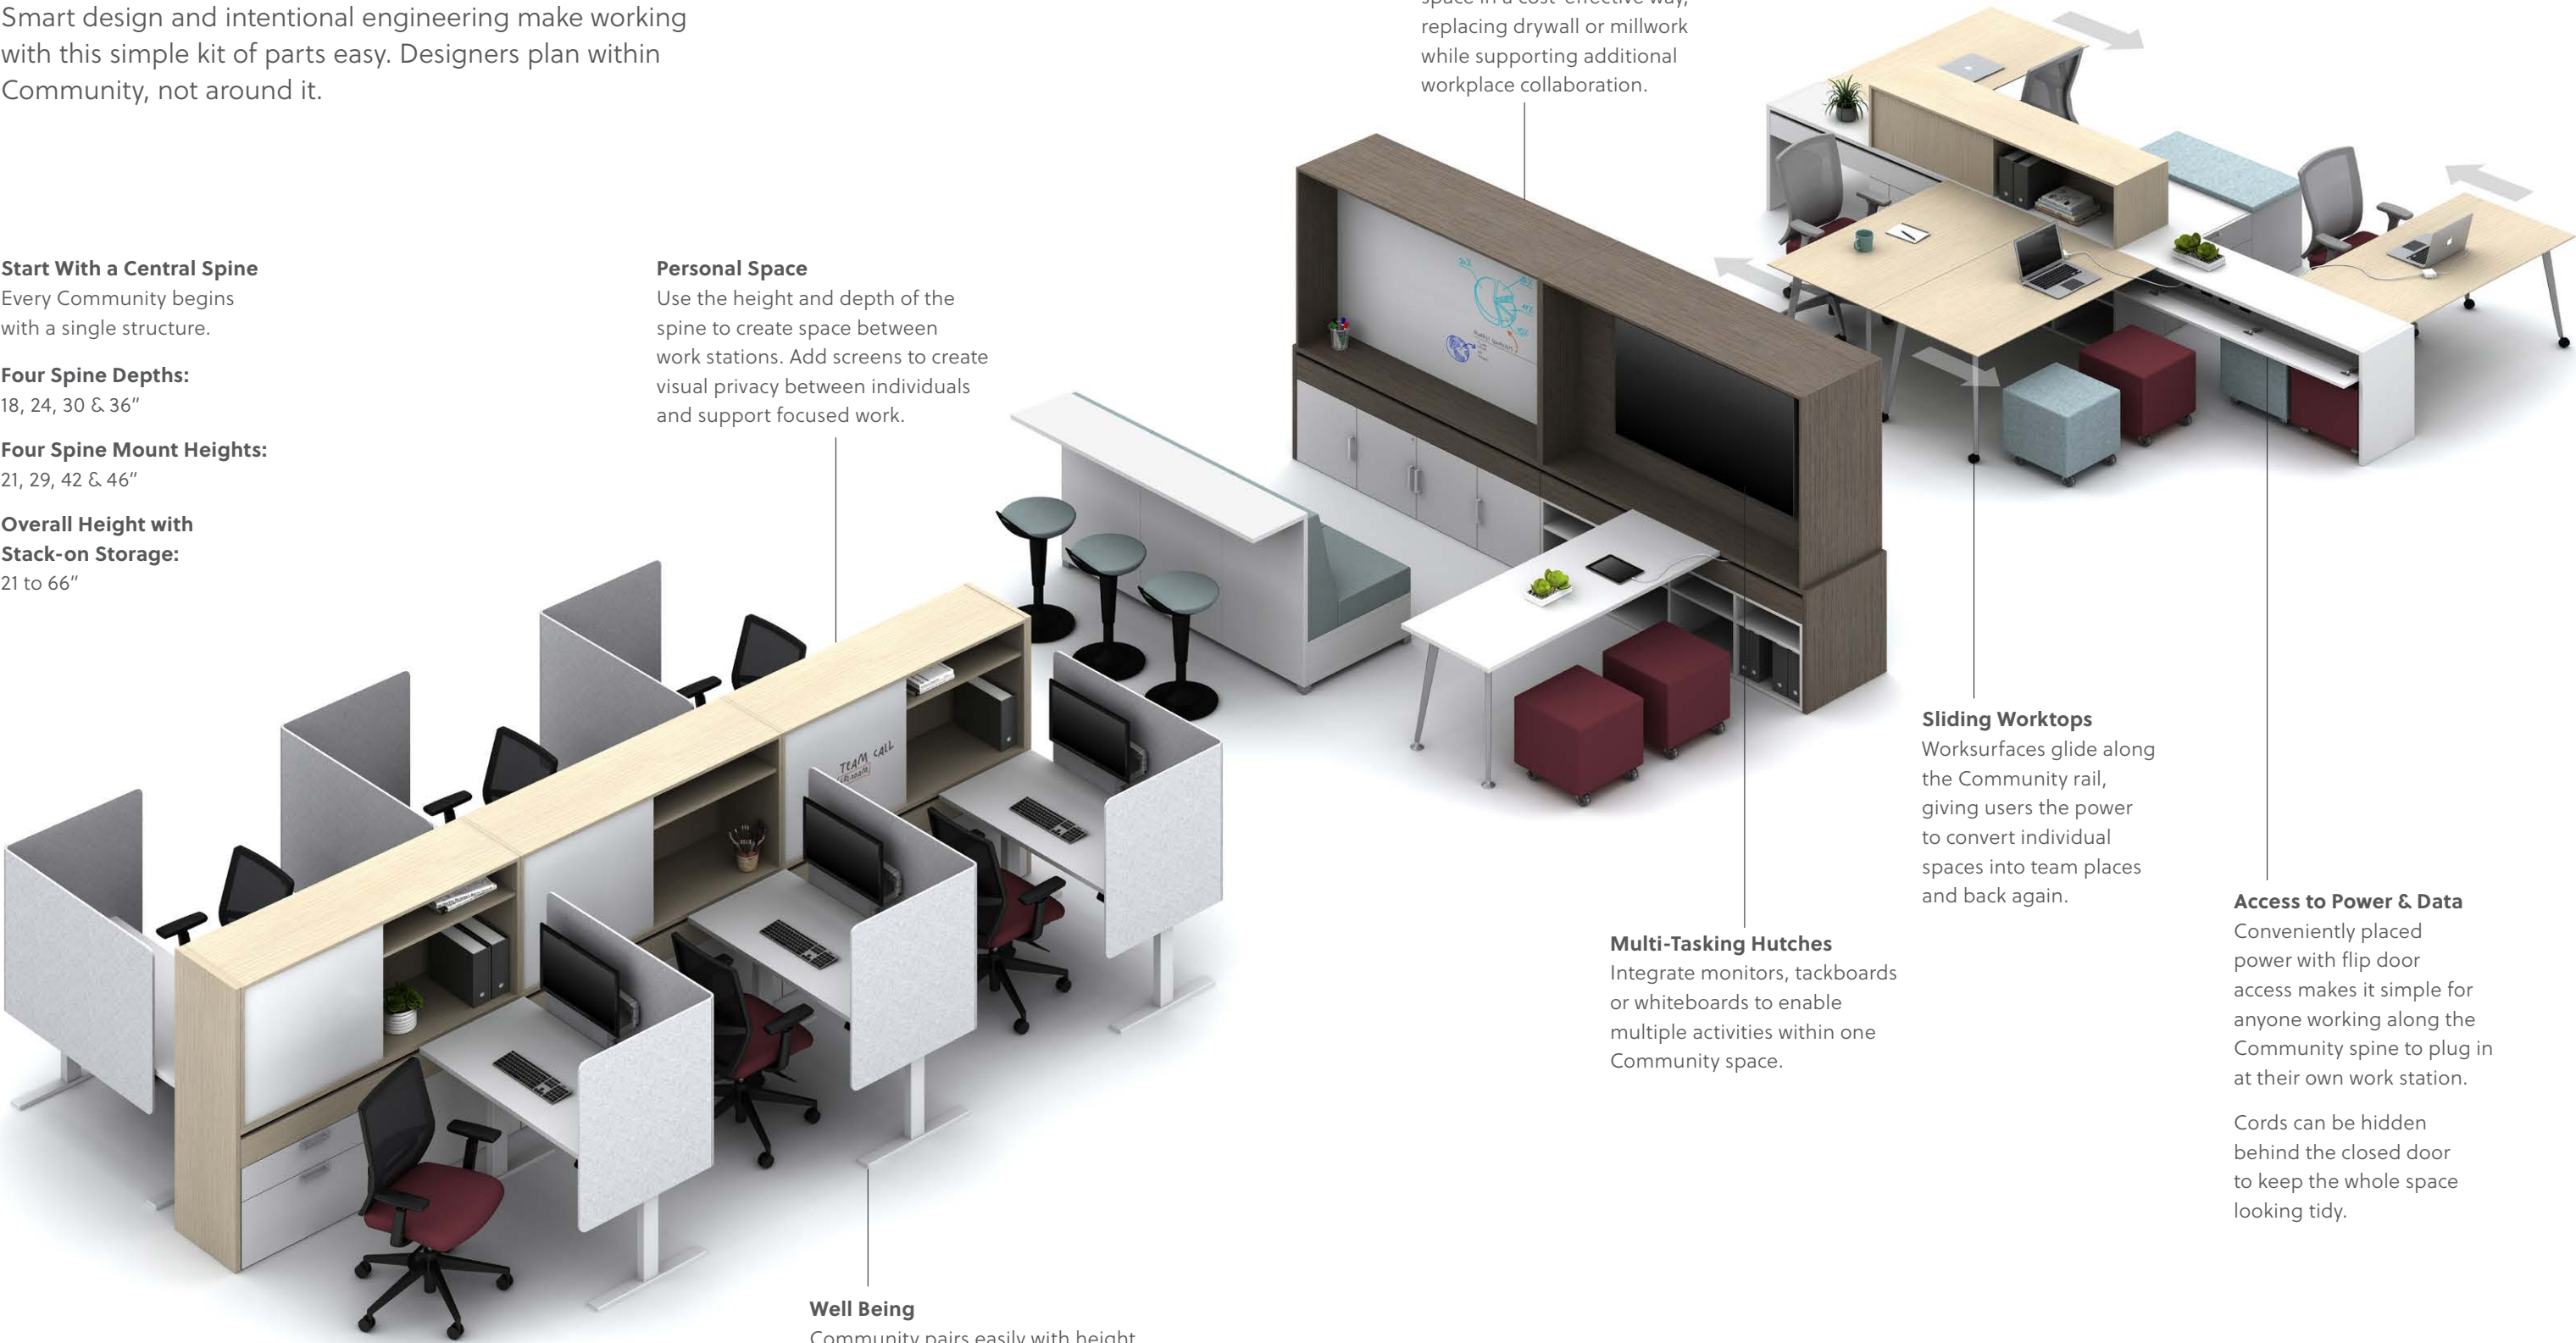

Access to Power & Data

Conveniently placed power with flip door access makes it simple for anyone working along the Community spine to plug in at their own work station.

Cords can be hidden behind the closed door to keep the whole space looking tidy.

Well Being

Community pairs easily with height adjustable tables, promoting frequent posture changes within individual work spaces.

YOUR VISION, OUR COMMUNITY

Bring the look and feel of architecture into your office without sacrificing the efficiency of open plan furniture thanks to unmatched capabilities including concealed robust power management, sliding tops, and unique, cantilevered storage. Community offers many design choices and is simple to specify with over 20 finish options.

No matter what you need, Community can meet the vision for your space and beautifully support your teams’ workplace requirements.

FINISHES

Select from a variety of Grade A laminates.

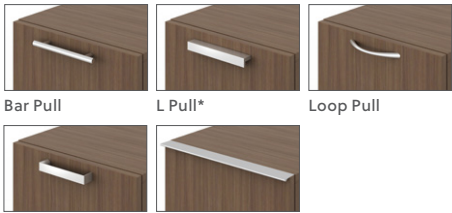

FEATURES AND OPTIONS

- Dimensioned for integration with Calibrate Series Products
 - Spine depths: 18, 24, 30, & 36"
 - Spine mount heights: 21, 29, 42, & 46"
 - Combine Community Spine and Upper Hutches up to 66" overall height
 - Community Lower Storage is available at 13" and 21" high to fit under and support 21" and 29" high spines
 - Stack-on Upper Storage Hutches available in many configurations and multiple heights, depths and widths
 - Power runs through spine, with flip door access to keep cords out of sight
 - Spine is available as dual sided, single sided and non-powered
 - 8 wire, 4 circuit power with side-mounted base infeeds, ceiling infeed, and end mount poles
- Table and worksurface options include:**
- Fixed and sliding run-off
 - Height-adjustable
 - Cantilevered from spine (with or without legs)
 - Stacked (21" spine height only)
- Please refer to the *Community Pricebook* for all options.**

Flip Door offers quick access to power & data.

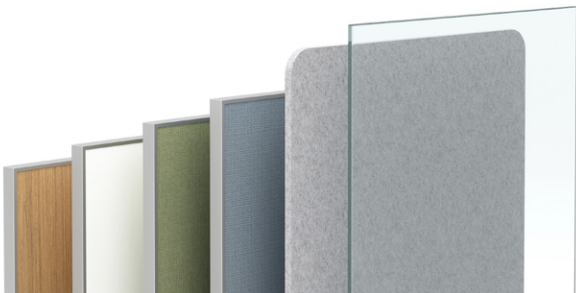

Available in all paint colors. (Calibrate Series storage only).
Slim Pull available on drawers – not doors.
Combo units with Slim Pull drawers will have standard touch-to-open doors without pulls.
*Paint finish only. (Not offered in raw metal finish).
Note: Slim Pull upcharge applies. (See pricelist).
